VILLAGE OF ALBION

The Village of Newport was laid out in 1821, with approximately 100 acres where the Erie Canal crosses Oak Orchard Road (Route 98). The booming village was selected as the new county seat for the County of Orleans. The village was renamed Albion in 1826. The Erie Canal played an important part in the growth of early Albion. In about 1860, one of the main businesses was the quarrying of Medina Sandstone, which can be seen used as a main building material in and around downtown.

Serving as the central focal point of our historic district is the Orleans County Courthouse. It is a fine example of the Greek Revival style and was constructed in 1857-58 for \$20,000. This property is listed on the National Register of Historic Places and is protected by the United States Department of the Interior.

To the south of the courthouse is the county clerk's building. It was built in 1882, in the Eastlake style, and was designed by the same architect who designed the "Million Dollar Staircase" in our capital building in Albany. This building is basically still used for its original purpose, with the county's legislative chambers on the second floor.

As one looks at the many historic churches surrounding our courthouse square, one begins to realize the history and the many architectural styles represented in Albion.

We hope you enjoy your day in Albion and at our Strawberry Festival!
